Fill in the descriptions below for each operator. You can use this in the future as a reference guide to help you with your labs.

Operator	Description
+	Adds values on either side of the operator
-	Subtracts value left of operator by value right of operator
*****	Multiplies values on either side of the operator
/	Divides left hand operand by right hand operand
%	Divides left hand operand by right hand operand and returns remainder
******	Performs power calculation to operand
//	Divides, but the decimal place of the answer is removed, resulting in a whole integer. If answer is negative, rounded towards -infinity
